

# SECURITY EXECUTIVE FORUM –LONDON

## EVENT SCHEDULE

### DAY ONE

<i>Time</i>	<i>Event Activity</i>	<i>Description</i>
08:30-09:00	MORNING TEA/ COFFEE, LIGHT REFRESHMENTS	Arrive early to savor a freshly brewed tea or coffee accompanied by an assortment of baked delights. Take advantage of this time to network and secure premium seating.
09:00-09:30	INTRODUCTION	The hosts will give an overview of the seminar agenda, and their professional backgrounds and experience. Attendees will introduce themselves and the organizations they represent.
09:30-10:45	INTELLIGENCE BRIEFING	An overview of both macro and micro threats unfolding and discussion on using and integration intelligence analysis into a security framework.
10:45-11:00	MORNING BREAK	Use the break to connect with fellow professionals while enjoying fresh coffee and a selection of light refreshments.
11:00-12:20	PREDICTIVE PROFILING	In an evolving threat landscape, anticipating and mitigating risks before they occur is a key advantage. This session explores Predictive Profiling and its real-world applications. Attendees will learn how it enhances situational awareness, decision-making, and response strategies. The lecture covers both theory and practice, with emphasis on procedure integration and training.
12:20-13:30	LUNCH	An opportunity to network over lunch.
13:30-14:50	ADVERSARY'S WORKSHOP	Understanding how adversaries think and operate is essential to building effective security strategies. In this Adversary's Workshop, participants will adopt the mindset of threat actors through a hands-on simulation of real-world attack planning. Guided by facilitators, groups will plan attacks on designated targets, exploring adversarial tactics and identifying key vulnerabilities. In phase two, participants shift to defense, developing countermeasures to mitigate, prevent, and respond to the planned attack. The session leaves security leaders with insights into adversarial thinking/proactive threat response. <a href="#">Presented by Amotz Brandes.</a>
14:50-15:10	AFTERNOON BREAK	Take a moment to stretch your legs, enjoy a hot beverage and sample a selection of sweet treats.
15:10-16:30	INSIDER THREAT PREVENTION	Companies invest heavily in external threats, yet insider threats—often more damaging—are overlooked due to their complexity and sensitivity. Whether caused by malice, coercion, or negligence, they challenge security and operational integrity. The session explores practical strategies to identify, prevent, and mitigate insider threats. Attendees will learn about behavioral indicators, risk assessment tools, and proactive measures that integrate with existing policies. The presentation offers actionable insights to build an effective, discreet insider threat program that maintains resilience, workplace trust and culture. <a href="#">Presented by Peter Hayes.</a>
17:00-18:30	SECURITY SOIRÉE	Join us for an exclusive networking reception to relax, share insights, and celebrate with peers. Whether discussing Red Teaming over a whiskey or diving into Predictive Profiling with a mocktail, this is a chance to connect. Come for the drinks, stay for the conversation.

## DAY TWO

<i>Time</i>	<i>Event Activity</i>	<i>Description</i>
08:30-09:00	MORNING CAFE/TEA, LIGHT REFRESHMENTS	Please arrive early and enjoy a fresh cup of tea or coffee with a selection of assorted baked goods.
09:00-10:20	MANAGING FEAR - EMPOWER YOUR WORKFORCE	One overlooked roles of security executives is that of "fear consultant" - balancing panic and complacency to build a proactive security culture. This module explores how fear impacts decision- making and how leaders can manage it by demystifying threats, promoting awareness, and offering clear solutions. Attendees will learn strategies to reduce anxiety-driven responses, overcome resistance, and foster resilience. <a href="#">Presented by Amotz Brandes.</a>
10:20-10:40	MORNING BREAK	Refreshments and a chance to stretch your legs.
10:40-12:15	RED TEAMING – DEFEAT THE ENEMY BY BECOMING THE ENEMY	Red Teaming is an underutilized yet highly effective tool for ensuring readiness, threat orientation, and operational effectiveness. Beyond penetration testing, Red Teaming simulates the entire adversarial process—from surveillance and intelligence gathering to dry runs and execution. It functions as both quality assurance and training - motivating teams, enhancing decision-making and exposing vulnerabilities. Gain insights into implementation, preparedness, stress-testing protocols and fostering a proactive security mindset. <a href="#">Presented by Jonathan Barkan.</a>
12:15-13:30	LUNCH	An opportunity to network and break bread with forum attendees over lunch.
13:30-14:45	THREAT-ORIENTED SECURITY CASE STUDY IN RED TEAM IMPLEMENTATION	Successfully integrating Red Teaming into a global security strategy requires more than just tactical exercises—it demands a culture of security performance that aligns with diverse legal, ethical, and organizational frameworks. This presentation will provide a real-world case study on the implementation of a Red Team program within a multinational organization operating across North America and Europe. Attendees will gain insights into navigating differing legal frameworks, balancing privacy and employee rights, and structuring Red Teams to maximize effectiveness and compliance. The case study will illustrate the benefits of both external and internal Red Teaming, demonstrating how a dual approach enhances threat awareness, security readiness, and operational resilience. Security leaders will leave with actionable strategies to build, refine, and sustain a Red Teaming program that strengthens their organization's defenses and decision-making. <a href="#">Presented by Mike Prout.</a>
14:45-15:05	AFTERNOON BREAK	Stretch your legs, grab a cup of coffee and enjoy assorted sweets.
15:05-16:30	ACTIVE SHOOTER MITIGATION AND RESPONSE	Active shooter and suicide bomber attacks present some of the most challenging and devastating threats facing us today. This module provides actionable methods for countering and responding to these threat, to mitigate risks and maximize survival outcomes using real world case studies. This session will challenge conventional approaches and equip participants with a threat-oriented mindset to stay ahead of evolving dangers. <a href="#">Presented by Amotz Brandes.</a>
16:30-16:45	CONCLUSION	Attendees will be handed certificates of completion and will review the relevance of the course material to their organization's security operations.
